SESSIONS @ MICHIGAN

Application Summary

Sessions @ Michigan is a custom web application built by Technology Solutions in Student Life. It was created in the Fall of 2015 for the *First Year Experience* initiative and rapidly adopted by all Student Life units and the wider University community to manage registration and attendance for their on-campus events. ***Core features include:***

- **The ability to collect customized information through a custom formbuilder, waitlisting and communication features for your event's registrants and robust sharing features to publicize your event.**

- **Sessions also offers several ways to track attendance for your event including: scanning Mcards and self check-in kiosks.**

- **Your data is made available through direct downloads, integration with Google Drive and Salesforce.**

Development is ongoing and Sessions continues to evolve with new features and enhancements.

If you are interested in bringing **Sessions @ Michigan** to your department or school, please contact Student Life Technology Solutions. Training sessions are regularly offered to give an overview of the features and capabilities of the system.

STUDENT LIFE TECHNOLOGY SOLUTIONS
